nilsskoglund-portfolio.streamlit.app

Self-starter with a strong work ethic. I enjoy being part of and contributing to a well functioning team that with the help of code and powerful digital technologies work on incrementally improving a system. I'm looking to transition from data analytics into fullstack development.

PERSONAL PROJECTS

Healthcare Software Tool (06/2022 - Present)

- Helping my doctor friends build a software tool to be used for better diagnostics of Pulmonary Embolism

Personal health & fitness support Web application (02/2023 - Present)

- Building a web application for me and my friends to help us plan, track & analyze health & fitness related activities

ACHIEVEMENTS

SQL Intro Course (01/2022 - 03/2022)

During my time at the coding bootcamp company Nod, I developed an introductory course for SQL. I was also responsible for selling and delivering the course. The project was successful and added great value to Nod's offerings. The course was built for Google Cloud Platform and involved working with Google BigQuery and Google Data Studio.

Data Analytics/Science Workshops at The Karolinska Institute (10/2021)

Lead two data analytics/science workshops at the Karolinska Institute hosting 31 participants made up of doctorates & professors. The workshops were a success and established a relationship between Nod & Karolinska that continues to develop with Karolinska sending doctorates to Nod's courses.

Team Captain Soccer Youth Team (01/2006 - 12/2012)

I was the Captain of my soccer team throughout my youth. We were a highly competitive team in the Stockholm Region
